The included code stub will read an integer, n , from STDIN.

Without using any string methods, try to print the following:

123... n

Note that "... " represents the consecutive values in between.

Example

$n = 5$

Print the string **12345**.

Input Format

The first line contains an integer n .

Constraints

$1 \leq n \leq 150$

Output Format

Print the list of integers from **1** through n as a string, without spaces.
